

Классическая очередь

```
class UploadController
{
    public function actionUpload(UploadRequest $request)
    {
        $imageProcessor = new ImageProcessor();

        $result = $imageProcessor->process($request->getUploadedFile());

        return $this->sendResponse($result);
    }
}
```

Классическая очередь

```
public function actionUploadAsync(UploadRequest $request)
{
    $queue = new RedisQueue(new Redis());

    $queueMessage = new ImageProcessingMessage($request->getUploadedFile());
    $queue->send( queueName: ImageProcessingService::QUEUE_NAME, $queueMessage);

    return $this->sendResponse();
}
```
